

## OJT WEEKLY JOURNAL

**Name:** Jeff Mathew

**Course:** BSIT

**School:** Pamantasan ng Lungsod ng Muntinlupa

**Company:** SP Madrid Associates

**Week #:** 1

**Date Covered:** February 17–21

---

### Weekly Objective

To familiarize myself with the different systems used in SP Madrid Associates, explore low-code/no-code platforms, and begin hands-on experience by creating an AI and a website using Bubble.io.

---

### Task to Be Performed

- Attend company orientation and system overview
  - Learn about systems used and their specific purposes
  - Create a simple website using [Bubble.io](https://bubble.io)
  - Explore AI creation using provided tools
  - Create an AI with instructions and test its responses
-

### **Date Task Started / Accomplished**

<b>Task</b>	<b>Date Started</b>	<b>Date Accomplished</b>
Orientation and system overview	Feb 17	Feb 17
Website creation (Bubble.io)	Feb 18	Feb 19
AI exploration	Feb 19	Feb 20
AI with instructions	Feb 20	Feb 21

---

### **Output / Accomplishment**

I was able to complete a simple website using Bubble.io and learned how to navigate its drag-and-drop interface. I also created a basic AI, customized its behavior through prompt instructions, and tested it successfully. I participated in the orientation and understood the systems used within the company.

---

### **Challenges Encountered**

At first, it was challenging to understand how Bubble.io works since it was my first time using a no-code platform. I also had a hard time structuring the AI instructions properly. I overcame these by watching tutorials, asking my supervisors for guidance, and practicing until I became more confident.

---

### **Skills/Knowledge Gained**

- Basic website building using Bubble.io
- Understanding how no-code development works
- Introduction to AI development and prompt engineering

- Familiarization with company systems and workflows
- Improved problem-solving and self-learning skills
